

7th December, 2014

To whom it may concern,

Hererim we confirm that we have a longstanding collaboration with the Institute of Molecular and Cellular Biology (Novosibirsk) on neotropical fish molecular cytogenetics. We plan to perform common projects on fish molecular cytogenetics in nearest future, including visiting the Institute in Novosibirsk in 2015 by our colleagues and performing experiments on high through put sequencing of fish chromosomes.

Yours Sincerely,

Dr. Patricia Pasquali Parise-Maltempi

Animal Citogenetic Laboratory

Associate professor - UNESP

Dr. Ana Maria Costa Leonardo

Head of Departament
